Professional Profile

Financial analyst with investment-banking experience in company valuation, financial modelling and investment assessments, complemented by corporate finance experience at Nestlé Nespresso. Currently completing an M.Sc. in Finance with research in empirical asset pricing, financial markets and machine learning. Combines fundamental analysis, quantitative methods and data tools to inform investment and business decisions.

Investment & Analytical Highlights

- **Valuation:** Developed DCF and comparable-company analyses across approximately 20 valuation projects, including scenario testing and support for IPO assessments.
- **Research:** Applied Python, FinBERT and regression methods to 239 FOMC meetings; current thesis compares linear and machine-learning approaches to predicting stock returns.
- **Data-driven finance:** Built financial dashboards and reporting controls at Nespresso; analysed approximately 409,000 billing records using Python and SQL.

Professional Experience

Working Student, Finance – Controlling & Accounting **Nov 2025 – Sep 2026**
Nestlé Nespresso SA *Düsseldorf, Germany*

- **Profitability analysis:** Consolidated Oracle-reported sales with COGS and operating expenses into the Munich Bar P&L, supporting margin and operating-KPI analysis.
- **Financial performance:** Reviewed retail revenue, costs and profitability against budget, latest forecast and prior year; prepared recurring management reports.
- **Investment and cost monitoring:** Developed Power BI dashboards tracking marketing-campaign spending and third-party supplier costs for forecast and performance reviews with business stakeholders.
- **Financial data and controls:** Prepared reports with SQL, Snowflake and Power Query; reconciled legacy SAP-based reporting outputs against new datasets during a migration.
- **Risk and process analytics:** Built a Python/SQL workflow to examine approximately 409,000 billing records for payment-risk patterns and technical exceptions; supported receivables, month-end and fixed-asset reconciliations.

Working Student – Financial Analyst **Jul 2018 – Sep 2020**
Arian Tamin Afarin Investment Banking *Tehran, Iran*

- Built and updated DCF models and comparable-company valuations across projects using financial statements, sector research, peer data and operating forecasts.
- Estimated cash flows, WACC and terminal values; conducted sensitivity and scenario analyses around growth, margins, discount rates and valuation assumptions.
- Supported investment assessment, due diligence and IPO-pricing discussions through financial analysis, written reports and management presentations.
- Contributed to portfolio-performance and diversification analysis, including value-at-risk and Monte Carlo simulation methods.

Sales & Marketing Specialist **Oct 2015 – Mar 2018**
BUT Iran *Tehran, Iran*

- Consulted prospective customers, presented solutions, addressed objections and closed sales; refined sales approaches using client and campaign feedback.
- Coordinated marketing activities, trained and coached team members, organised meetings and delivered presentations to groups, strengthening leadership and public-speaking skills.

Education

M.Sc. Business Administration – Finance Specialisation **Oct 2023 – expected Jan 2027**
University of Münster *Münster, Germany*

- Focus: empirical asset pricing, investments, financial engineering and quantitative methods. Master's thesis in progress.

B.Sc. Financial Management **2015 – 2020**
Azad University, Tehran *Tehran, Iran*

- Teaching assistant for undergraduate course "Audit".

Selected Investment & Quantitative Research

Master's Thesis – Machine Learning in Empirical Asset Pricing In progress

- Comparing OLS, Ridge and LASSO factor models with random forests, gradient boosting and neural networks for cross-sectional stock-return prediction in Python.
- Investigating out-of-sample performance and the trade-off between interpretability and predictive accuracy.

FOMC Statements and Asset Prices Grade: 1.0

- Analysed 239 Federal Reserve policy meetings with Python, FinBERT and regression models to study how financial markets responded to policy communication.
- Combined text-based indicators with market data in an empirical study of asset-price reactions.

Private Equity Real Estate – Fund Manager Selection Grade: 1.3

- Evaluated two US logistics real-estate funds through manager and strategy due diligence, including risk assessment and investment comparisons; recommended an allocation in a simulated USD 40 million university case study.

Personality Traits and Investment Decisions Grade: 1.7

- Studied determinants of investment behaviour using SOEP survey data; performed principal component analysis, regressions and robustness checks in R.

Investment, Technical & Language Skills

Investment analysis: DCF, comparable-company valuation, financial statement analysis, WACC, terminal value, scenario/sensitivity analysis, investment due diligence, portfolio and risk analysis.

Quantitative research: Econometrics, regression, PCA, empirical asset pricing, machine learning, NLP/FinBERT, Monte Carlo methods; Python, R, Stata.

Data & reporting: Advanced Excel, Power BI, Power Query, SQL, Snowflake, VBA, Oracle reporting, Git/GitHub; SAP reporting-data validation.

Languages: English (C1), German (C1), Persian (native).
